

Certificates of Original Design and Commercial Use

80 buildings - issued 30 September 2026

What these are

One page per building, like the licence a 3D model generator issues with each creation. Each page records where the design came from, who owns it, what the owner may do with it, and a fingerprint of the exact print files. Keep them with your business records. Print, sign and file the page for a building when you list it, or attach it when a marketplace or buyer asks whether a design is yours to sell.

What they are not

A certificate records origin and commercial-use rights; it is not a copyright registration and does not by itself stop someone copying a printed model. How far copyright protects a design made with an AI tool depends on the human creative contribution to it (here, the owner's choice of styles, colours, rules and revisions, and the painting and finishing).

No.	Building	Style	Begun
1	The Beaumont	Queen Anne	23 September 2026
2	The Ashby	Italianate villa	23 September 2026
3	The Harcourt	Second Empire	24 September 2026
4	The Fowler	Octagon house	24 September 2026
5	The Whitby	Carpenter Gothic cottage	24 September 2026
6	The Delancey	San Francisco Italianate row house	24 September 2026
7	The Ardmore	Richardsonian Romanesque	24 September 2026
8	The Merritt	Stick style	24 September 2026
9	The Hollis	Folk Victorian farmhouse	24 September 2026
10	The Carrow	Queen Anne castle	24 September 2026
11	The Pemberton Block	Three-storey brick commercial block	24 September 2026

80	The Beaver Run Trestle	Timber trestle bridge kit	28 September 2026

CERTIFICATE OF ORIGINAL DESIGN AND COMMERCIAL USE

The Beaumont

HO scale model building No. 1

Building	No. 1 - The Beaumont
Style	Queen Anne
Scale	HO, 1:87.1
Footprint	150 x 180 mm
Parts	72 printable parts
Design begun	23 September 2026 (commit e95933d797c3)
This release	26 September 2026 (commit 9991a58d4705)
Version	v1.1
Print files	Beaumont_Queen_Anne_Print_Files_v1.1.zip (21.9 MB)
SHA-256	df044c1a7ad464523fea933269fde3cf987e246c6f8909e3e7ce9a8c3223c2c3

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

Owner / business	Signature	Date
------------------	-----------	------

This certificate records the design's origin and the owner's right to use it commercially. It is not a copyright registration.

CERTIFICATE OF ORIGINAL DESIGN AND COMMERCIAL USE

The Ashby

HO scale model building No. 2

Building	No. 2 - The Ashby
Style	Italianate villa
Scale	HO, 1:87.1
Footprint	180 x 156 mm
Parts	117 printable parts
Design begun	23 September 2026 (commit feac933cb3b2)
This release	30 September 2026 (commit 3e1928210203)
Version	v1.1
Print files	Ashby_Villa_Print_Files_v1.1.zip (17.8 MB)

The Pemberton Block

HO scale model building No. 11

Building	No. 11 - The Pemberton Block
Style	Three-storey brick commercial block, 1868 style
Scale	HO, 1:87.1
Footprint	131 x 156 mm
Parts	42 printable parts
Design begun	24 September 2026 (commit fcad2a4fbf9d)
This release	26 September 2026 (commit 27931c76948c)
Version	v1.1
Print files	Pemberton_Print_Files_v1.1.zip (8.2 MB)
SHA-256	4523b57a9107749b81af41b531d0b31a87871ed8e8b8d2929b6aaeeca0f4b457

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

Laurel & Myrtle

HO scale model building No. 24

Building	No. 24 - Laurel & Myrtle
Style	San Francisco Italianate row houses
Scale	HO, 1:87.1
Footprint	192 x 136 mm
Parts	77 printable parts
Design begun	25 September 2026 (commit aff4872caa74)
This release	26 September 2026 (commit 9991a58d4705)
Version	v1.1
Print files	Twins_Print_Files_v1.1.zip (8.7 MB)
SHA-256	df8f4404f11b7b20d52a11982ed25aee77ad9dffffcb1f215bbf8c0ccc3bb566

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

SHA-256	71e83cdb7cb8ff76c28be935ef59f7103a59e7b3c7c300ba1cf480194a1b10c4

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

Engine Company No. 3

HO scale model building No. 64

Building	No. 64 - Engine Company No. 3
Style	Village engine house, 1884 style
Scale	HO, 1:87.1
Footprint	110 x 150 mm
Parts	45 printable parts
Design begun	28 September 2026 (commit 3efa7e7831e9)
This release	28 September 2026 (commit 325afe3058de)
Version	v1.1
Print files	Engine_Company_No3_Print_Files_v1.1.zip (12.3 MB)
SHA-256	329794502b6cdf68d18622e0010cf6a402fcee1d88962d76a15153bae626a152

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.

The Crossing Shanty and Oil House

HO scale model building No. 77

Building	No. 77 - The Crossing Shanty and Oil House
Style	Crossing watchman's shanty, 1895 style
Scale	HO, 1:87.1
Footprint	20 mm across
Parts	19 printable parts
Design begun	28 September 2026 (commit e498eceaba3b)
This release	28 September 2026 (commit 80c33b582ebf)
Version	v1.1
Print files	Crossing_Shanty_Oil_House_Print_Files_v1.1.zip (3.3 MB)
SHA-256	53d7c3914513a992a41d959c034e07a8e51aa2db50f39f1f7b66e75efbfb070c

Original design

This model was designed from scratch for its owner, in the owner's own parametric design library, with the AI assistant Claude (made by Anthropic) writing the code under the owner's direction, review and revision. Historical architectural styles and the owner's photographs of existing buildings served only as inspiration. The model contains no geometry taken from any third-party 3D model, kit, scan or model-generation service.

Ownership

Under the Anthropic Consumer Terms of Service, effective 8 October 2025 (anthropic.com/legal/consumer-terms), Anthropic assigns to the user all of its right, title and interest, if any, in the outputs of its service. No model-generation service, kit maker or other designer holds any interest in these files. The owner holds all rights that exist in the design files, the print files, the renders and the printed models.

Commercial use

The owner may print, finish, paint and sell the model, built or as a kit, in any quantity and on any marketplace; photograph and advertise it; and license or sell the print files. No royalty, attribution or licence fee is owed to anyone.

Provenance

The design's full history is kept in the git repository github.com/fqtzr2yhcv-spec/kg (private), whose commits carry the dates above. The SHA-256 fingerprint identifies the exact print-file release this certificate covers; later revisions of the same design are covered too, and have their own fingerprints.
